5 REASONS
TO CHOOSE ONNEC

For over 30 years Onnec has been designing and delivering environmentally conscious, global IT infrastructure projects for hyperscalers, colocation providers and enterprise data center clients. See why we are uniquely positioned, to help you keep up with demand and deliver certainty in your connected space.

MASTER SYSTEMS INTEGRATION

Experts in designing and deploying structured cabling, data networks, physical building security projects with a comprehensive understanding on how they all inter-connect, for the most resilient, secure, and agile business outcome.

GREAT VENDOR RELATIONS

Working with all the major strategic vendors to design and deliver best-in-class solutions unique to every client requirement.

ONE GLOBAL, TRUSTED PARTNER

A single point of contact to simplify the whole supply chain, delivering the highest standard of service and best practice project management consistently delivered for numerous multi-national hyperscale, colocation and enterprise clients.

QUALITY & ASSURANCE

End-to-end data center solutions, from structured cabling to a full suite of IP services delivered by our in-house team, on time and on budget, meeting the demands of your business to deliver the secure, agile, always-on environment.

MANAGED SERVICES

Access to in-house experts ready to add on-site or off-site resource to your environment wherever you need them. All security vetted and trained to the highest certifications.

Connect with Onnec – to deliver business growth and certainty in your data center space.
