

DATA CENTRE SPECIALISTS

Trusted delivery and support services
partner for critical IT Infrastructure

INDUSTRY LEADING END-TO-END SOLUTIONS

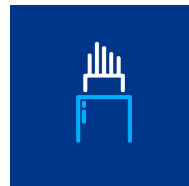

In an industry where change is the only constant, data centre operators require partners with proven experience in supporting the creation of sustainable, efficient, resilient, and technology-driven environments

Leveraging 40 years of unrivalled expertise, we have developed a comprehensive portfolio of end-to-end installation and support services which support clients through every stage of their infrastructure lifecycle. With a dedication to working to the highest industry standards and our Safety First approach, we are proud of our reputation to be the trusted partner of choice.

WHY CHOOSE ONNEC?

- **A global partner at a local scale**
Locally trained teams delivering consistent, compliant services worldwide as we scale with our customers.
- **Partnered with world leading manufacturers**
Trusted partnerships with world-leading manufacturers ensure future-ready, high-performance infrastructure.
- **End-to-End Lifecycle Support**
From grey and white space fit-out to ongoing maintenance and support services, retrofit, and decommissioning, Onnec supports every stage.
- **Trusted at the top**
Chosen by global businesses to deliver some of the world's most advanced data centre facilities.

OUR DATA CENTRE SOLUTIONS & SERVICES

Grey Space Fit-Out

Our services turn grey space into a fully operational data centre, delivering structured cabling and infrastructure to support critical systems, IT hardware, and seamless connectivity for live operations.

White Space Fit-Out

We deliver complete white space fit-outs—including containment, cabinets, and rack-and-stack—ensuring seamless, high-performance installations in both project and live environments.

Operational Support

Operational excellence doesn't stop at go-live. From rack-and-stack and IMACD, to patching and testing—we ensure your data centre runs smoothly, scales efficiently, and stays at peak performance.

Refresh & Decommissioning

We manage full lifecycle upgrades, including infrastructure refresh, complete retrofits, or end-of-life decommissioning, ensuring your data centre remains efficient, future-ready, and fully optimised.
