## Flexible, On-Demand IT Infrastructure Support Services

**When your business needs fast, flexible, and reliable on-site support, Onnec's Day Works services give you access to the right expertise, exactly when you need it.**

Our Day Works services provide rapid, reliable access to skilled technicians to support both planned activities and reactive requirements. Whether you need additional resource for a specific task, urgent fault resolution, or ongoing on-site support, our dedicated Day Works technicians deliver high-quality service with minimal disruption. Designed for flexibility, we integrate seamlessly with your operations, helping you stay agile while maintaining performance across your IT and network infrastructure.

## FROM DATA POINT TO DATA CENTRE

Day Works is delivered through experienced Onnec technicians who provide site-based support across all environments. Typical activities include:

- Communications cabinet tidy-ups and reorganisation
- Small-scale installations (e.g. additional data points, patching, minor adds and changes)
- Decommissioning of communications racks and legacy equipment
- Preventative maintenance of network cabinets
- Reactive maintenance in response to faults or site requests

Whether it's a single repair, an upgrade or preparing for a larger rollout, Onnec can help.
