

SECURE INFRASTRUCTURE & MOD-ALIGNED SERVICES

Trusted Partner in MOD and defence environments, delivering secure, resilient infrastructure with confidence.

WHO WE ARE?

Onnec is a trusted partner specialising in secure infrastructure and communications environments. For over 30 years, we have designed, deployed, and supported resilient infrastructure for security-sensitive and mission-critical organisations.

Our expertise spans the full infrastructure lifecycle, from design and installation through to ongoing operational support. Using a security-led, assurance-driven approach, our vetted personnel work within strict governance, access control, and compliance frameworks, ensuring alignment with MOD requirements, JSP standards, and operational procedures while protecting critical assets across both physical and digital environments.

WHY CHOOSE US?

- **Trusted in Secure and Regulated Environments**
We have a proven track record of delivering infrastructure solutions within highly regulated and security-sensitive environments, where compliance, assurance, and operational resilience are essential.
- **Security & Compliance by Design**
Security considerations are embedded throughout our delivery methodology, aligning with MOD expectations and relevant JSP frameworks to ensure secure, compliant outcomes from design through to support.
- **Safety First**
Our "Safety First" culture underpins all activity, ensuring compliance with MOD safety governance and safe working practices in restricted or operational environments.
- **Global Capability, Controlled Delivery**
We combine international experience with disciplined local delivery, supporting secure installations where governance, access control, and assurance are critical.

OUR SERVICES

Structured Cabling

We design and install high-integrity structured cabling systems that provide the secure and resilient foundation required for modern network infrastructure.

Secure Infrastructure

End-to-end lifecycle support for secure installations, including equipment installation, integration, and deployment within controlled environments, technical spaces, and comms rooms.

Network Solutions

Delivering a secure network that enables reliable connectivity, supporting both modern and legacy architectures while maintaining compliance and resilience.

Support Services

We provide ongoing operational assistance, maintenance, and lifecycle management to ensure infrastructure remains secure, compliant, and available.
